

Guidewire Explore for Policy

Enabling Smart Business Decisions

DATA SHEET

Traditional data warehouses are necessary for financial reporting and are critical to support important data management needs in a core systems transformation. But these solutions leave business leaders struggling to get the insight they need to make key operational decisions.

The pace of decision-making has increased, data is abundant, and advances in technology have opened new opportunities to address business needs. Customers want to get more from their core systems investment with deeper insights into their business. What's needed is a real-time, instant-on solution for targeted business problems at an affordable cost.

The Challenges

- **Incomplete and stale information:** Data from yesterday or last month isn't useful for decision-making today. Team management, catastrophe response, and rising customer expectations all demand real-time information.
- **Insight obscured by static reports:** Static reports and traditional business intelligence can answer only those questions that the business had yesterday—not the questions it will need to answer tomorrow.
- **Not having the right tool for the right purpose:** While necessary for financial reporting, data warehouses are costly and often extended for inappropriate use cases. Business leaders are then left to work outside these solutions because they cannot get their enhancements prioritized.

SMART, SIMPLE, NOW

- Gives you a smart, personalized solution for targeted business problems
- Augments decision-making with a simple and intuitive experience
- Increases business agility with fast answers to ever-evolving business questions
- Delivers more from your core systems investment
- Achieves fast time-to-value with an instant-on solution—providing a predictable cost and low risk

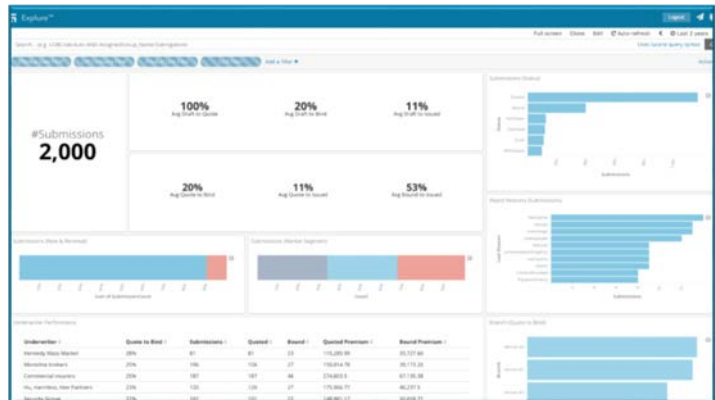

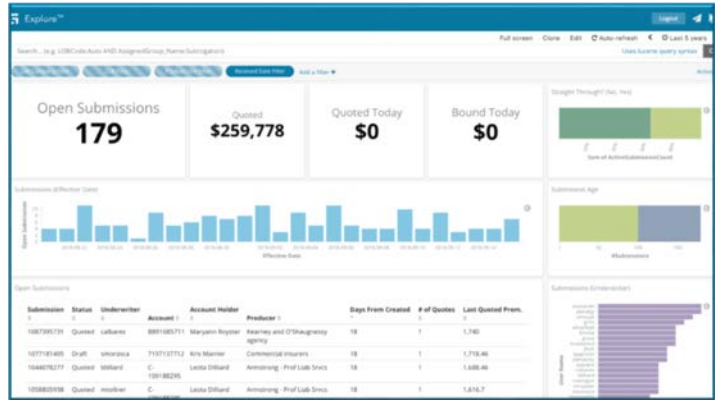

Guidewire Explore for Policy

Explore

Guidewire Explore™ for Policy is a next-generation, real-time, instant-on analytic solution that empowers business users to examine their operational policy data and accelerate decision-making while improving customer responsiveness and boosting user productivity.

- Smart business decisions:** Explore for Policy improves underwriting efficiency and profitability by enabling smart business decisions such as underwriting submissions processing, conversion analysis, pipeline analysis, balancing team workload, uncovering process bottlenecks, and achieving profitability targets.
- Simple design:** Explore for Policy augments decision-making without feeling overbearing, intrusive, or abstract. It provides free-form universal search across curated Guidewire PolicyCenter™ data with numerous visualizations and dashboards that help guide specific actions.
- Increased user productivity:** Explore for Policy brings together business analysts, data scientists, data-savvy managers, underwriters, and executives with real-time insights that improve not only customer responsiveness but also internal processes while boosting user productivity. All insights can easily be embedded back into PolicyCenter.

Business Benefits

Explore for Policy is a cloud-native application that provides the following benefits compared to more traditional approaches:

- Fast time-to-value:** Because Explore for Policy is instant-on, business users will be up and running rapidly to solve business problems without requiring a lengthy data warehousing project.
- Predictable cost:** This analytic solution is available at a fraction of the cost of legacy business intelligence applications. Because it’s a cloud-native, fully managed solution, you have predictable costs with no long-term commitments. It also means no upgrades—you’re always running the latest version of the software.
- Low risk:** Subscribing to a service instead of licensing software also reduces your risk. Your IT department can focus on creating strategic value for the business instead of maintaining and upgrading infrastructure or systems.

About Guidewire Software

Guidewire delivers the industry platform that Property and Casualty (P&C) insurers rely upon to adapt and succeed in a time of accelerating change. We provide the software, services, and partner ecosystem to enable our customers to run, differentiate, and grow their business. We are privileged to serve more than 350 companies in 32 countries.
