

# WORKERS' COMPENSATION INSURANCE SOFTWARE

## 6 Things to Consider

**1**

### Underwriting Functionality

Support complex and collaborative underwriting environments

**2**

### ISO, NCCI, State Bureau Content

Implement content quickly, with streamlined updates and maintenance processes

**3**

### Claims Data Validation

Ensure that claims are filed completely and accurately to improve settlement decisions, reducing adjustments/losses

**4**

### Fraud Prevention

Use system controls & predictive tools to identify potential fraud early and aid in loss prevention

**5**

### Long-Term Claimant Relationships

Enable adjusters to focus on customer experience for the duration of the relationship

**6**

### Collaborative Claim Fulfillment

Allow collaboration and communication between insured, adjuster, claimant, service providers
